CBC	■350	06:00 AM – 10:00 PM
Blood Glucose – Fasting	■100	06:00 AM – 10:00 PM
Lipid Profile	■600	06:00 AM – 10:00 PM
Liver Function Test	■700	06:00 AM – 10:00 PM
Kidney Function Test	■600	06:00 AM – 10:00 PM
Urine Routine	■150	06:00 AM – 10:00 PM
HbA1c	■450	06:00 AM – 10:00 PM
Thyroid Profile	■650	06:00 AM – 10:00 PM

6. Visiting Hours & Patient/Attendant Rules

Area	Visiting Timing / Rule
General Wards	04:00 PM – 06:00 PM
Private Rooms	10:00 AM – 08:00 PM; subject to hospital policy
ICU / Critical Care	Restricted; family visits only during designated periods
NICU / Pediatric Critical Care	Restricted; follow clinical team's instructions
Emergency Department	Visitors controlled according to patient safety and clinical needs
Maximum Visitors	Normally 1–2 attendants per patient, subject to department rules
Children as Visitors	May be restricted in critical-care areas

7. Appointment & Admission Workflow

1. Patient selects department/doctor and preferred appointment slot.
2. Reception or digital system verifies patient details and appointment availability.
3. Patient completes registration and provides required identification/insurance information.
4. Doctor consultation is completed and investigations are ordered when clinically required.
5. For admission, the hospital confirms bed/room availability and completes admission formalities.
6. Billing/insurance desk handles estimates, deposits, approvals, and final settlement.
7. Discharge includes prescription, follow-up instructions, reports, and billing clearance.

8. Patient Information Required

For Appointment	For Admission	For Emergency
Patient name	Patient name & age	Patient identity if available
Age / date of birth	Government ID	Emergency contact
Phone number	Address & contact details	Known allergies
Department / doctor	Insurance details, if applicable	Current medicines, if known
Preferred date/time	Previous medical records	Relevant medical history

9. Insurance, Billing & Payment

- Cash, card and supported digital payment methods may be accepted.
- Insurance/cashless treatment is subject to the hospital's active insurer/TPA agreements and approval requirements.
- Patients should confirm coverage, exclusions, co-payments, room-rent limits, and pre-authorization requirements before planned admission.
- An initial estimate is not necessarily the final bill; actual charges can change based on clinical treatment and investigations.
- Patients should request itemized bills and receipts for payments made.

10. Facilities & Patient Support

- 24×7 emergency and ambulance coordination
- Inpatient wards and private rooms
- Pharmacy and diagnostic laboratory
- Radiology / imaging services
- Waiting areas and visitor facilities
- Wheelchair-accessible patient areas
- Billing and insurance support
- Medical records and report collection
- Patient help desk / reception
- Dietary support for admitted patients, where applicable

11. Hospital Policies

- Patient privacy and confidentiality should be maintained according to applicable law and hospital policy.
- Photography/video recording inside clinical areas may be restricted.
- Visitors must follow infection-control, safety and security instructions.
- Smoking and prohibited substances are not permitted within hospital premises.
- Aggressive, disruptive, or unsafe behavior may result in visitor restrictions.
- Clinical decisions are made by qualified healthcare professionals based on the patient's condition.
- Service availability and prices may change; the reception/billing desk should be treated as the final source for current charges.

12. Emergency Information

For a medical emergency: Contact the hospital emergency desk / local emergency services and seek immediate medical care. Do not delay urgent treatment while waiting for an appointment or administrative confirmation.

13. Data for Hospital AI / Agent System

Data Category	Example Fields
Hospital	name, address, phone, departments, facilities, timings
Doctor	doctor_id, name, specialty, qualification, availability, consultation_fee

Data Category	Example Fields
Service	service_id, department, description, price, duration, availability
Appointment	appointment_id, patient_id, doctor_id, date, time, status
Patient	patient_id, name, DOB, contact, allergies, medical-record reference
Admission	admission_id, patient_id, ward, bed, admission_date, discharge_date
Billing	bill_id, patient_id, services, amount, insurance, payment_status
Knowledge Base	FAQs, visiting rules, hospital policies, service descriptions, price list

14. AI Assistant Usage Notes

- The assistant can answer hospital information and service questions using the verified hospital knowledge base.
- The assistant can check appointment availability only through the authorized appointment system.
- Patient-specific medical information should be retrieved only after appropriate authentication and authorization.
- The assistant should not invent prices, doctor schedules, bed availability, medical records, or appointment confirmations.
- If information is missing or outdated, the assistant should direct the user to hospital staff rather than guessing.
- Sensitive patient data should be stored and accessed according to applicable privacy, security, and healthcare requirements.

Document status: Sample / development dataset | **Version:** 1.0 | **Prepared for:** Hopecare Hospital information and AI-agent project

Before deploying this document in a real hospital system, replace all sample contact details, prices, schedules, policies, doctor information, and service availability with verified hospital data.
